Sciences; *Spanish; Textbooks

ABSTRACT

Bibliographic data, physical characteristics, contents, prices, and ordering instructions for Spanish instructional materials listed in this issue of the Materials Acquisition Project are provided for each entry. Subject categories include general works, social science, language arts, pure science, technology, the arts, literature, and history. Materials are classified according to the Dewey decimal system by subject matter, with related subject areas utilized. The annotation is an objective description of materials and often includes suggestions concerning appropriate grade-level and utilization of materials. The bibliographic materials are generally adapted for use by bilingual teachers. Many familiar works included in the compilation have been translated from foreign languages into Spanish. For the companion documents, see FL 002 968, FL 002 969, and FL 002 971-FL 002 977. (RL)

EXTENDED SERVICES

As an added and continuing service to you, this issue contains annotations of non-book materials. A non-book section will appear periodically in the project's future issues. The list below indicates the coding that will be utilized for each individual non-book category.

art prints	(CA)
charts	(CT)
diorama	(RA)
film (motion picture 16mm)	(MP)
film (motion picture 8mm loop)	(FL)
filmstrip, silent	(FS)
filmstrip, sound	(SS)
flash cards	(FC)
game	(GA)
globe	(GL)
kit	(KS)
map	(CM)
mock-up	(RM)
picture	(CP)
realia	(RE)
recording, disc	(RD)
recording, tape	(RT)
slide	(SL)
specimen	(RS)
study print	(SP)
tape, video	(MV)
transparency	(ST)

The Dewey numeration system will be utilized to classify each area of the non-book materials listed above. This system will provide the necessary consistency throughout the publication.

500—PURE SCIENCE

MATHEMATICS

- 510 Zubieta R., F.
Aritmética razonada (aritmética y algebra) 2a ed. 1969, by F. Zubieta R. and Elodia Sánchez Romay. México. n. pub. n.d.
160p. illus. H.S.

An easy and well-structured textbook for instruction in general mathematics. Progresses from a discussion of ordinal numbers through basic mathematical processes: addition, subtraction, etc., all the way to some basic algebraic concepts on the use of equations. Well-suited for general math on a high school level and might possibly be used as a resource book for students needing remedial work. Printed on newsprint with black-and-white diagrams as illustrations. Private printing distributed by Librería Patria, México. May be used as a series.

Order from 7,9

Price \$.80

MATHEMATICS

- 510 Zubieta R., F.
Geometría razonada y trigonometría. México. n. pub. n.d.
88p. illus. Sec.

An introduction to plane geometry which uses traditional axioms and theorems. Tries to offer the student an initiation not only to the science of geometry but to its specialized vocabulary as well. Suitable for a secondary level and would make a fine resource book for individual student use because of its inexpensive price. Printed on newsprint with black-and-white diagrams as illustrations. Private author printing available from Librería Patria, México.

Order from 7,9

Price \$.40

ALGEBRA

- 512 Zubieta R., F.
Algebra elemental. México. n. pub. n.d.
274p. illus. H.S.

A well-structured textbook for basic algebra. Good explanation of material with a logical progression. Well-suited for the senior high school. Contains a table of logarithms plus a table for computing compound interest. Printed on newsprint with black-and-white diagrams as illustrations. Librería Patria, México, D.F. These books have had much success as reference books for Mexican secondary students. May be used as a series.

Order from 7,9

Price \$1.76

GEOMETRY

- 513 Zubieta R., F.
Geometría analítica, (apuntes) by F. Zubieta R., Ramón Cortés B., Fernando Vásquez D., Vianney Vergara S. and Luis Zubieta R. México, n. pub. n.d.
144p. illus. H.S.

A series of notes and supplementary explanations which are intended for use with any textbook in an advanced mathematics class. An orientation in primary and secondary equation systems plus some knowledge of the rudiments of trigonometry are necessary for comprehension of this material. For maximum efficiency notes should be used in chapter sequence but can be used purely as resource upon mastery of 1st chapter. Recommended for advanced math classes on a secondary level. Printed on newsprint with black-and-white diagrams and illustrations. May be used as a series. Private printing distributed by Librería Patria, México.

Order from 7,9

Price \$.80

GEOMETRY, ANALYTIC

- 516 Lehmann, Charles H.
Geometría analítica; English title: analytic geometry, tr. by Rafael García Díaz, México. UTEHA, c1959.
462p. illus. H.S.

A hard-cover text. Excellent quality. 17 chapters contain: systems of coordinates, graphics of an equation and geometric places, straight lines, equations of circumference, transformation of coordinates, parabolas, ellipses, hyperbolas, general equations, polar coordinates, parametric equations, plane curves, points in space, planes, lines in space, surfaces, curves in space, résumé of formulas, definitions and theorems, and tables
